ABSTRACT

IDENTIFIERS

This is the third of three volumes reporting a project to develop an instrument to evaluate instructional materials used in bilingual education, community language education, and bicultural education programs in Australian schools. The project had three purposes: (1) to examine the research literature on the development of models and instruments to evaluate immigrant education resource materials; (2) to develop an instrument based on appropriate criteria and standards; and (3) to utilize the developed evaluation instrument for the analysis of Dutch bilingual and bicultural educational materials available to Australian schools. This volume contains the four evaluation instruments developed during this project: (1) Criteria for the Evaluation of Resource Materials-Evaluator's Form; (2) Criteria for the Evaluation of ' Resource Materials, Background Characteristics in General Contexts-Evaluator's Form; (3) Criteria for the Evaluation of Resource Materials, Decision-Making in a Specific Context-User's Form; and (4) Criteria for the Evaluation of Resource Materials-Evaluator's Form for Annotations. The criteria and standards for these instruments were developed primarily from the following instruments: the Sussex Scheme (Eraut, 1975); EPIE form A (Educational Products Information Exchange Institute); the Ethnic Studies Materials Analysis System and the Curriculum Materials Analysis System (Social Science Education Consortium). (BS)

Reproductions supplied by EDRS are the best that can be made from the original document.

A GUIDE FOR SELECTING .. BILINGUAL BICULTURAL RESOURCE MATERIALS: THE ANALYTIC INSTRUMENT

TABLE OF CONTENTS

1. Analyses: Criteria for the Evaluation of Resource Materials - Evaluator's Form

2. Analyses: Criteria for the Evaluation of Resource Materials.

Background Characteristics in General Contexts - Evaluator's
Form

3. Analyses: Criteria for the Evaluation of Resource Materials. Decision-making in a Specific Context - User's Form

4. Annotations: Oriteria for the Evaluation of Resource / Materials - Evaluator's Form

The criteria and standards of this analytic instrument were developed through referral to existing analytic instruments for the evaluation of instructional materials. The purpose of this Preface is to acknowledge the sources of those criteria and standards included within this instrument. Firstly, the Evaluator's Form to that part of the instrument titled Criteria for the Evaluation of Resource Materials, will be considered.

Generally, the organization of the constructs, Rationale, research and development, Goals, Contents, Methods and Evaluation are based upon the analytic instrument, EPIE form A developed by Educational Products Information Exchange Institute. Additionally, the introductory, concluding and summary sections, Identification of resource material, Contingencies and, congruences, and Assessment and recommendations, are derived from this source. The incorporation of a subsequent section, Background characteristics, was developed through juxtaposition of factors in the instructional setting identified in relation to use of EPIE form A in the selection of resource materials, and the relevant section of the Curriculum Materials Analysis System developed by the Social Science Education Consortium.

Within the section, Identification of resource material, the following criteria have been developed from corresponding descriptors, indicated in parentheses, of EPIE form A: 1.1 (IA), 1.2 (IB), 1.3 and 1.4 (IC), 1.5 (ID), 1.6 (IE), 1.7 (NF), 1.8 (IG), 1.9 (IH), 1.10 (II), 1.13 (IJ), 1.14.2 (VIID), 1.15 (VIIB), 1.16 and 1.17 (VIIC) and The format for specification within 1.5 has been 1.18 (VIIA). adopted from the format applied by the Dissemination and Assessment Center for Bilingual Education within their Cartel series of publications. The following criteria of this instrument were developed from descriptors in the Ethnic Studies Materials Analysis System, an analytic instrument of the Social Science Education Consortium developed from the Curriculum Materials Analysis System: 1.11 (1.3) and 1.12 (1.4). The criterion, 1.14.1, has incorporated within the instrument the Coefficient of Evaluation developed by Pratt (1971, 1972). The descriptors within the criterion 1.19 have been developed from descriptors within part 7.0 of the Curriculum Materials Analysis System.

Within the construct, Rationale, research and development, the following criteria have been developed from the corresponding descriptors within EPIE form A: 2.1 (IIA) and 2.2 (IK).

Criteria within the construct, Goals, have been developed from two sources: EPIEform A and the Curriculum Materials Analysis System. The criteria developed from EPIEform A are 3.1 (IIB) and 3.2 (IIC). However aspects of the cognitive objectives from Curriculum Materials Analysis System have been embodied within the criteria of the Goals: 3.1.2 (2.41) and 3.2.2 (2.43).

The categories of the construct, Contents, are derived from a variety of sources. The following criteria within the category, Characteristics, derive largely, from Robinson (1978: 62): 4.1.1, 4.1.2, 4.1.3 and 4.1.4. The criteria, 4.1.5.1 and 4.1.5.2, have been developed from Mackay (1977: 259). Additionally, the following criteria have been developed from criteria devised by the National Bilingual Materials Task Force in relation to instructional materials analysed for inclusion in Educational Products Information Exchange Institute (1976): 4.1.5.3 from the criterion Linguistic Content and 4.1.6 from the criterion Language Level. The criteria of the subcategory, Contents, of the Scope have been developed from criteria, indicated within parentheses, of the Sussex Scheme developed by Eraut et al. (1975):.4.1.1.1 (2.1) and 4.1.1.2 (2.2). The criteria of the subcategory, Coverage, of the Scope, and the Sequence, have been developed from EPIEform A: 4.2.2 (IIIA), 4.3.1 (IIIB1) and 4.3.2 (IIIB2) Standards expressed within the criterion 4.2.2.1 have been developed from Robinson.

The criteria within the construct, Methods, derive from EPIE form A: 5.1 (IVA), 5.2 (IVB), 5.3 (IVC), 5.4 (IVD) and 5.6 (IVF). However, the standard expressed in the criterion 5.3.1 has been derived from 4.31 of the Curriculum Materials Analysis System.

The category, Responses, of the construct Outcomes, has been developed from Robinson. The instrument's capacity to analyse Outcomes within bicultural materials has resulted from modifications of criteria within the Curriculum Materials Analysis System: skills stated in 6.2.1.2.1 derive from 3.1; the disciplines presented in 6.2.1.2.2 have been developed through combining the semantic emphases detailed by Robinson with the disciplines included in the Curriculum Materials Analysis System. The value positions presented in 6.2.2 of the instrument derive from the affective objectives (2.52) and content (3.221) of the Curriculum Materials Analysis System. The categories of affective outcomes included in 6.2.2.2 have been partly developed from Robinson (1978: 61).

The following categories of the construct, Evaluation, have been developed from EPIE form A: 7.2 (VA), and 7.3 and 7.4 (VB).

The essential features of the concluding section, Contingencies and congruences, and the summary section, Assessment and recommendations, have been developed from *EPIE form A: 8 (VIA) and 9.1 (VIIIA).

Although the major subcategories of the section, Background Characteristics, have been derived from EPIEform A, criteria have been developed from Figure 3, Factors in the Instructional Setting, published within Educational Products Information Exchange Institute (1976: xvii): 10.4.1.1 (IA1), 10.1.1.2 (IA3), 10.1.1.3 (IA2), 10.2.1.1.1 (IB3), 10.2.1.2 (IB4) 10.2.1.3 (IB5), 10.2.2.1 (IC1), 10.2.2.2 (IC2), 10.2.2.3 (IC3), 10.2.2.4 (IC4), 10.3.1.1 (IIC1), 10.3,1.2 (IIC2), 10.2.1.3 (IIC3) and 10.3.2.1 and 10.3.2.2 (IIA1). Additionally, the standards of two criteria originate directly within EPIEform A: 10.3.1.3.1 and 10.3.1.3.2 (VIIC). Also everal criteria or standards have been developed from the surriculum Materials Analysis System: 10.1.1.2.1 (5.43), 10.1.2.2 (5.44), 10.1.1.3.1 (5.46), 10.2.1.1.1.1 (5.141), 10.2.1.3.2 (5.5), 10.2.2.2 (5.321), 10.2.2.3 (5.33), 10.2.2.4 (5.322), 10.3.1.4 (5.2) and 10.3.2.3.2 (5.13).

Acknowledgements of sources for the third part of the analytic instrument, the user's form for decision-making in a specific context in relation to resource materials, are detailed below. The four major sections of this part of the instrument have been derived from Part 5 of the Sussex Scheme.

Within the section, Contextual Constraints, the criteria have been largely developed from Figure 3, Factors in the Instructional Setting, published within Educational Products Information Exchange Institute: 1.1.1.1 (IA1), 1.1.1.2 (IA3), 1.1.1.3 (IA2), 1.1.1.4 (IA4), 1.1.2 (IB1), 1.2.1.1 (IB3), 1.2.1.2 (IB4), 1.2.1.3 (IB5), 1.2.1.4 (IB6), 1.2.1.5 (IB7), 1.2.1.6 (IB8), 1.2.2.1 (IC1), 1.2.2.2 (IC2), 1.2.2.3 (IC3), 1.2.2.4 (IC4), 1.2.2.5 (IC5), 1.2.2.6 (IC6), 1.2.3.1 (ID1), 1.2.3.2 (ID2), 1.2.3.3 (ID3), 1.3.2.1 (IIC1), 1.3.2.2 (IIC2), 1.3.3.1 and 1.3.3.2 (IIA1). Also the Following have been derived from Gurriculum Materials Analysis System: 1.3.2,4 (5.2) and 1.3.3.3.2 (5.13).

The standards defined within the second section, Decision Issues, derive from the alternative courses described within the Decision Arena in Educational Products Information Exchange Institute (1976: xx, xxii).

Within the third section, Implementation Strategies, the standards within 3.2.2.5 have been derived from 4.3 of the Curriculum Materials Analysis System.

In acknowledging the sources of these criteria and standards adopted within the analytic instrument, the author wishes to indicate that criteria and standards applying to EPIEform A and to Educational Products Information Exchange Institute are printed with the permission of Educational Products Information Exchange Institute, P. O. Box 839, Water Mill, New York, 11976, United States of America; that criteria and standards applying to the Curriculum Materials Analysis System: Long Form, revised edition, and the Materials Materials Analysis Instrument are printed with the permission of the Social Science Education Consortium, 855 Broadway, Boulder, Colorado, 80302, United States of America; and that criteria and standards applying to the Sussex Scheme are printed with the permission of Dr. Michael Eraut, School of Education, University of Sussex, Falmer, Brighton, Sussex, BN1 9RG, United Kingdom.

ERIC

1, 1, 1, 4

Ethnic Groups: connections with the school

1.1.1.4.1

relationships with the school

(specify)

1.1.1.4.2

attitudes towards the school

(specify)

1.1.1.4.3

support for successful implementation of this resource material

(specify)

1.1.2

Governmental Policies

1.1.2.1

Inputs
Inputs involve demands and supports
from the environment to the
policital system thereby affecting
governmental policies.

1.1.2.1.1

Demands
Demands are inputs lobbied by an interest croup. Select the types of demands concerned with resource materials for immigrant education made directly or indirectly by the school. Specify the nature and extent of each demand selected.

materials to the school		(specify)
		ч
·	•	
allocation of services to provide resource materials to the school		(specify)
		•
· ·		,
	;	
regulation of distribution of resource materials to the school		
1		(specify)
		·
•		₩
participation in the selection of resource materials		i e
for use in the school		(specify)
· · · · · · · · · · · · · · · · · · ·	4	

communication of information concerning the provision, distribution and selection of resource materials for use in the school

(specify)

1.1.2.1,2 🌋 S

Supports
Supports provide resources which
enable a government to carry out
demands.

Select the types of supports concerned with resource materials for immigrant education made directly or indirectly by the school. Specify the nature and extent of each support selected.

provision of resource
materials to use in the school
in response to government policy

(specify)

deference by school personnel to regulations concerning provision, distribution and selection of resource materials for use in the school

participatory support given
by school personnel to provision, distribution and selection of resource materials for
use in the school

(specify)

attention paid by school personnel to government communications regarding resource materials for use in the school

(specify)

1.1.2.2

Outputs
Outputs involve transactions
from the political system to the
social environment which may or may
not be in response to demands.
Select the types of outputs concerned
with resource materials for
immigrant education made directly
or indirectly to the school.
Specify the nature and extent of
each output selected,

extractive output:

provision of finances through
government grants for
purchase of resource materials
for use in the school

regulatory output: *
specifications
regulating uses to which
resource materials may be put
in the school

(specify)

allocative output: processes for distribution of resource materials for use in the school

(specify)

symbolic output:
governmental statements of
policy concerning resource
materials for use in the
school

'Summary of Decision Issues &

Contextual constraints
Simmarize factors that have
been taken into account, or will
need to be taken into account, in
selecting an alternative course,
or alternative courses, for using
this resource material in the school

(specify)

Decision issues
Summarize factors that have been taken into account or will need to be taken into account, in establishing congruence between the use of this resource material and an alternative course, or alternative courses, adopted, or to be adopted, in the school.

(specify)

Implementation strategies
Summarize factors that have been '
taken into account, or will need to
be taken into account, in establishing congruence between an'
alternative course or alternative
courses adopted, or to be dopted,
and the implementation strategy
adopted, or to be adopted, for using
this resource material in the ...
school.

(specify

Summary
Summarize the case in favour and
in opposition to the use, or intended
use, of this resource material in
the school in terms of constraints,
possible patterns of use and
inclementation strategies outlined.
